TECHNOLOGY REDEFINED

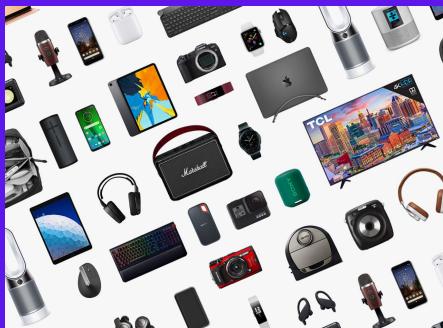

WINDOWS 11

JULY 2021 | ISSUE NO.01

TMOG

Contents

03 Editor-In-Chief Introduction

A brief introduction to the magazine and what we aim to do in future.

05 Tech is Impacting our lives!

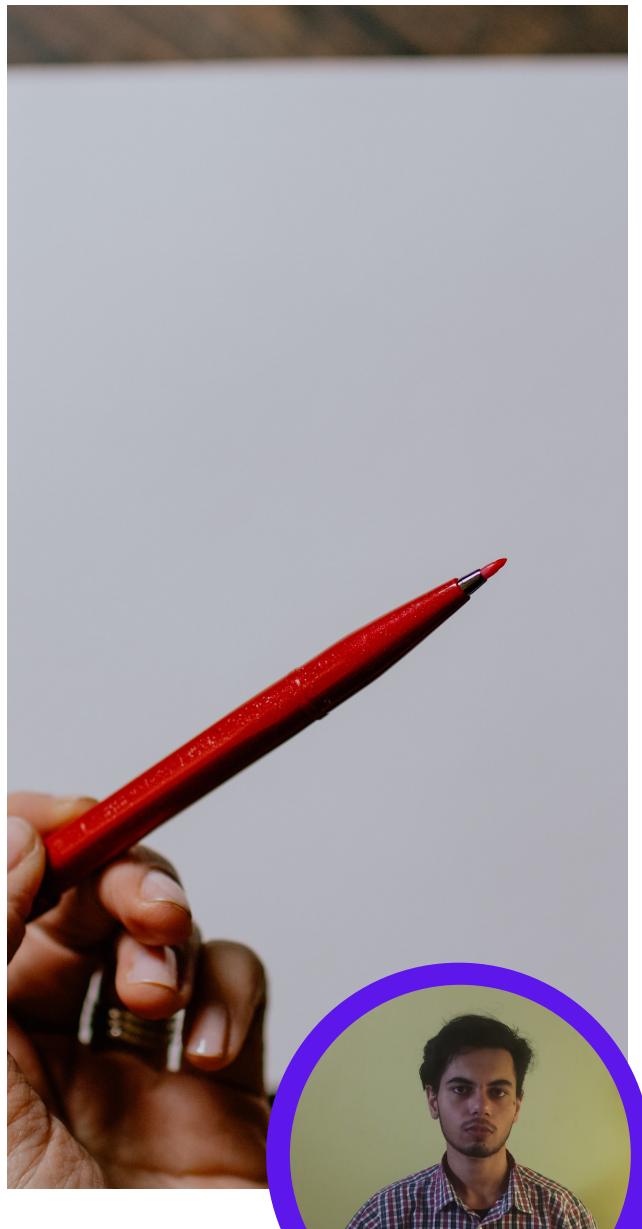

Ways in which technology is impacting our lives, not just externally but internally.

06 The Views: Windows 11

Read the views of the editor about Windows 11 as one of the biggest changes coming up for every PC user.

08 Pros and Cons: Sharing Views Openly

A walkthrough of the various pros and cons which come with sharing views and opinions openly and frankly.

EDITOR-IN-CHIEF

A Letter From The Editor

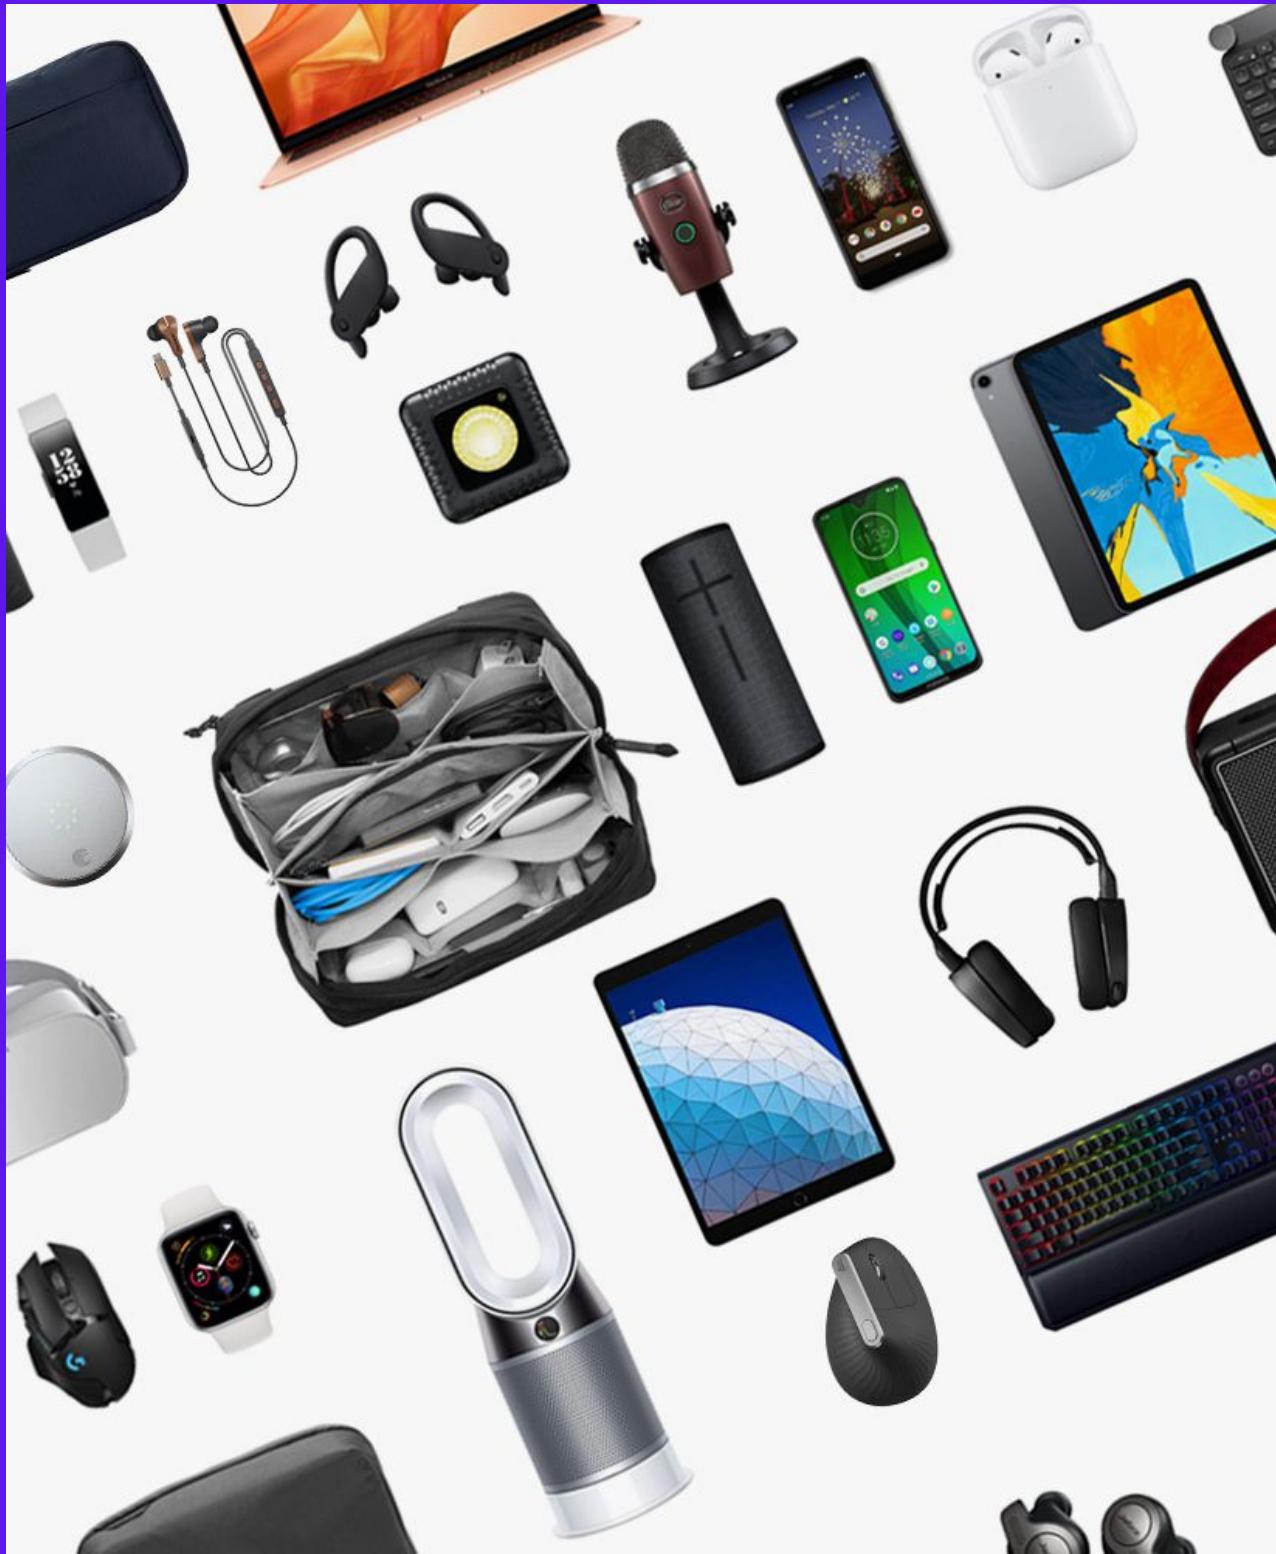

Welcome!

The Tech View Magazine is an initiative to convert views of people from industry into one of the most widely read forms i.e. Magazine. The Magazine will be published online. Through this medium, I invite each of you to contribute and support the initiative through content or in another way possible. Feel free to drop in a message or email me. The aim is to express yourself freely.

LOVE

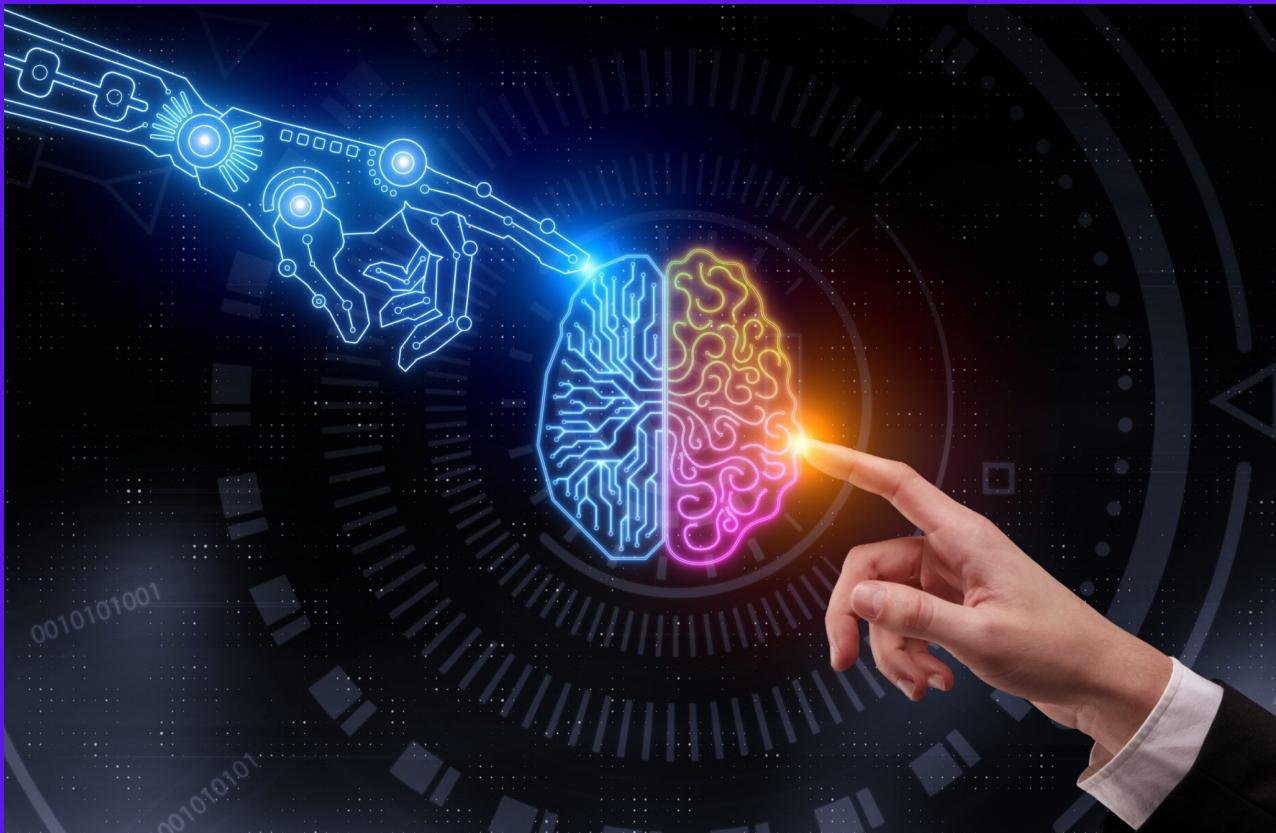

Anveet

Ways in which we get impacted daily!

TECH IS IMPACTING
OUR LIVES!

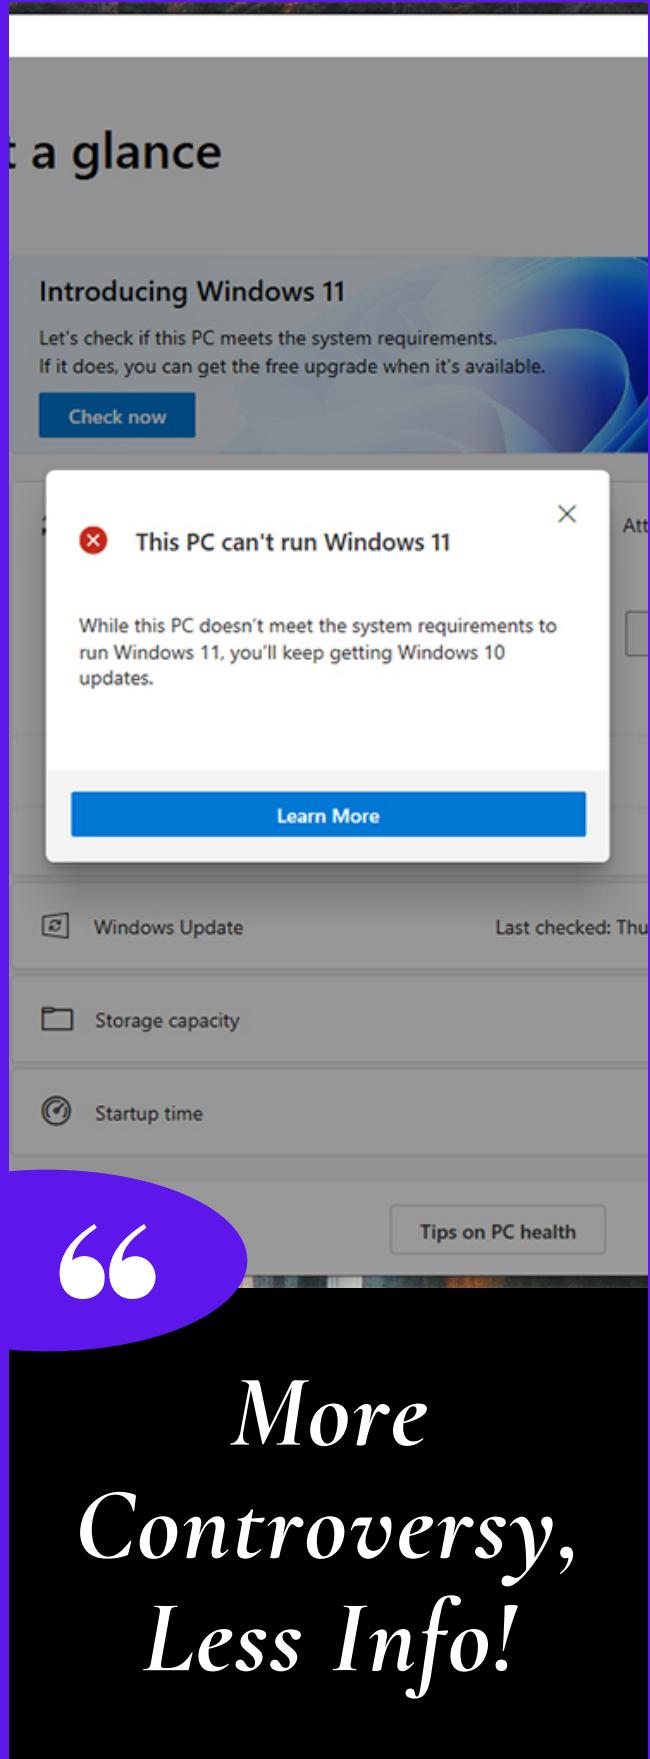

Technology has had a huge impact on all our daily lives, not just externally but internally.

Technology has been impacting us in various ways, not social media rather whole life. Now let's look at some:

- > Improved Communication but Reduced Privacy
We are able to go online and connect but we give our privacy a pause and sign up for tracking which can lead us to unfavourable consequences.
- > Virtual Lives but Anti Social
We are into social media this much that we ignore people physically around us.
But overall we can't live without it. It's a basic need nowadays.

IMAGINE A DAY WITHOUT TECHNOLOGY POSSIBLE?

NO

Windows 11 - 75% PCs can't run it

THE REAL CLARITY?

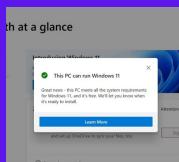

Since the launch of Windows 11, 75% of people have seen the error. Microsoft did clarify that tool has some issues and will be back in Fall but my questions comes why was it launched if it was half-baked. No one likes half-baked cookies, not even animals.

Windows made a huge fuss and rush to launch Windows 11 to beat Chromebooks via Android Apps integration. Chromebooks market was increasing due to pandemic and thanks to miners.

"Windows 11 preview build is out for older hardware but no update will come when Public release is done." WHAT EXACTLY ARE THEY DOING?

FEW QUESTIONS ANSWERED!

④ PC Health App

PC Health App is one of the biggest culprit to create the entire controversy. PC Health App doesn't have any set criteria for showing the exact error.

Even Microsoft acknowledged the bug in the app and took it down so that newer version is made available in fall. The Current version would mark any PC running hardware not specified in the list as unsupported whether it had the technology or not.

④ What are minimum requirements?

According to latest Microsoft Blog post, Minimum requirements include:

- >1 Ghz + and 2+ core CPU
 - >4GB + RAM
 - >64 GB Storage
 - >TPM 2.0
 - > Secure Boot(UEFI)
 - >DirectX 12 capable GPU
 - >720p + Display
 - >Internet Connection for installation (Home edition only)
- [Check Latest here>>>](#)

④ BUY NEW PC?

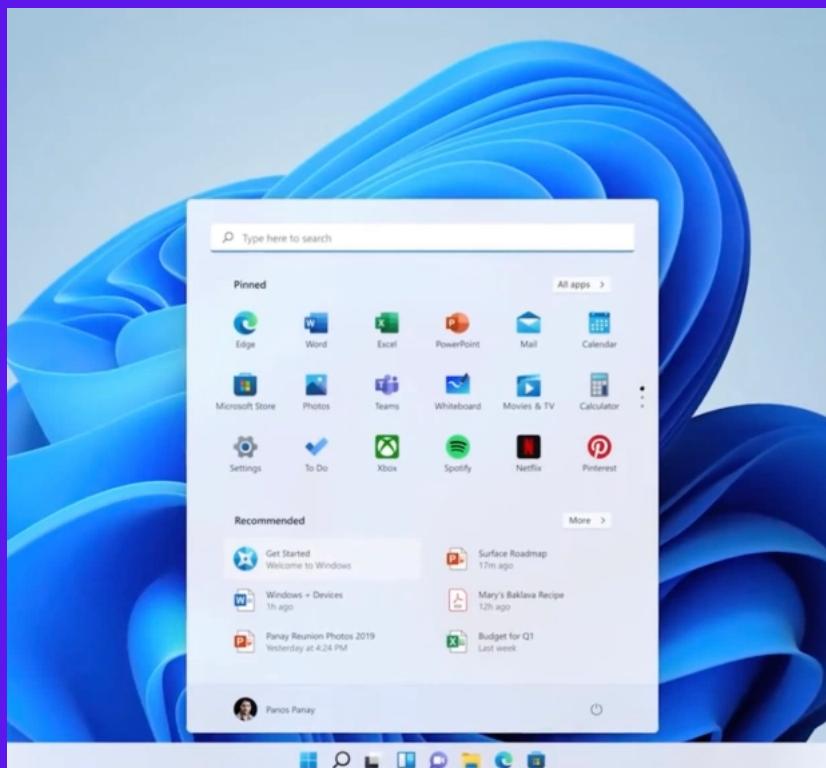

According to latest info and Microsoft announcements, I believe you shouldn't hurry in to buy a new PC or upgrade the hardware.

The hardware you already own will be compatible. Just keep yourself posted with Microsoft and Tech Milestone as there are ways to run Windows 11 on unsupported hardware as of now. Once public release is made you will have more clarity till then enjoy Windows 10 (updates available till 2025)

Unfiltered Views

IN THIS EPISODE OF PODCAST

WINDOWS 11

The Final Words!!!

Windows 11 is a total mess. The mess that started to make announcements for rivals and integrate every Microsoft product into one has turned out to be a fuss.

I would love to run Windows 11 no matter what due to its advanced features as well as new feel but preview builds are unstable and sometimes require data wipes due to critical/fatal bugs.

The new design and feel is inspiring and gives a new look. **It feels New!** Its a long way to go.

Change is the law of nature and is coming! We will have to wait till then and enjoy the content over at [The Tech View](#) and [Tech Milestone](#)

Guide On Sharing Views and Opinions Publicly!

Attend Courses & Watch Tutorials

The Best and wonderful way of learning the trick is to watch some tutorials to stick with, Following the type of language. Not going against any regional or public sentiments. Maintaining cordial relations even after criticising.

Choose Your Target and Prepare yourself

Views given without being asked or targeted and defended are of no use. Make sure to select a target or topic around which you want to share your views and opinions. Make sure you have enough knowledge about the topic that no backfire happens!

KNOW WHAT YOU EXPRESS

Use Your knowledge as a sword to defend.
